

SEBASTIAN LEONARDO SANTOS

Quispamsis, NB | (506) 639-8467 | sebysantos2006@gmail.com

PROFESSIONAL SUMMARY

Recent IT Software Development graduate from New Brunswick Community College with hands-on experience in AI automation, Microsoft Power Automate, SQL-integrated workflows, document management, and end-user technology support. Proactive, adaptable, and quick to learn new technologies, with strong communication, time-management, and problem-solving skills. Experienced in improving workflows, managing multiple priorities, collaborating with team members, and taking initiative in both technical projects and independent learning.

TECHNICAL SKILLS

- **Languages & Web Development:** C#, Java, JavaScript, PHP, HTML, CSS, and C++, with experience applying object-oriented programming principles and developing MVC-based web applications.
- **Frameworks & Libraries:** ASP.NET MVC, Express, React, Entity Framework, and LINQ for building web applications, connecting application logic to databases, and supporting structured data access.
- **Data, AI & Automation:** Hands-on experience with Microsoft Power Automate, AI-assisted automation, SQL-integrated workflows, MySQL, and MongoDB. Experience retrieving and processing database records, automating workflows, and integrating data-driven functionality into applications.
- **Version Control & Collaboration:** Experience using GitHub and GitHub Desktop to manage source code, track changes, and collaborate with multiple team members on shared development projects.
- **Development Practices:** Knowledge of Agile development methodologies, the software development life cycle, basic project management fundamentals, documentation, testing, and collaborative software delivery.
- **Additional Technical Experience:** Experience with C++ programming for Arduino and embedded systems, as well as game design and development principles through small-scale project work.

WORK EXPERIENCE

Junior Software Developer | Moosehead Breweries

Spring 2026

- Developed two AI-enabled automation solutions using Microsoft Power Automate and SQL data, applying automated flows, structured prompts and controls for reliable information input and output.
- Implemented document-processing workflows that tagged unstructured PDF files and used a trained AI model to reduce manual, high-volume work.
- Produced detailed project, implementation, and responsible AI documentation for the IT team, supporting maintainability and safe adoption.

Document Control | Irving Oil Limited

Summer 2025

- Supported three database document-management projects while maintaining accuracy, reliability, and compliance with team processes.
- Identified and shared workflow improvements that increased efficiency without compromising document quality or control.
- Created and delivered an end-of-term presentation summarizing project contributions to Irving Oil IT leadership.

Technology Installer & Instructor | Tech*Know - Loch Lomond Villa

Jan-Mar 2025

- Installed Google smart-home devices in seniors' homes and provided clear, patient instruction on setup, daily use, and practical benefits.
- Helped first-time technology users build confidence and connect more effectively with digital tools in their everyday lives.

EDUCATION

IT: Software Development | New Brunswick Community College

2024-2026

- Completed individual and team software projects and technical presentations while maintaining a 4.156 cumulative GPA.
- Balanced a demanding academic workload with employment, demonstrating strong time management, collaboration, and reliability.

High School Diploma - High Honours with Distinction | Kennebecasis Valley High School

2020-2024

- Completed AP Calculus and AP Physics; selected as a valedictorian nominee.
